Deer Park, VIC

ABOUT ME

I help organisations turn complex multi-source data into decision-ready insights and well-built products for all audiences, from consumers to executives.

Six years of end-to-end analytics across consulting (Quantum, including the Victorian COVID-19 response), Commonwealth health statistics (AIHW), and clinical informatics (currently at the Centre for Health Analytics, RCH / MCRI) - delivering 10+ data visualisation tools and dashboards. Strong data governance, quality, and reproducibility discipline from regulated government and clinical environments.

RELEVANT SKILLS

- Strong technical breadth: R, Python, SAS, Stata, Tableau, Azure, Snowflake.
- MSc Health Data Science (UNSW); CHIA-certified.
- Adaptable and efficient in fast-paced environments; strong attention to detail.
- Strong communicator across clinical, technical, and executive audiences.
- Capable of working independently and collaboratively within a team.

WORK EXPERIENCE

Dec 2024 –
Present

Clinical Data Analyst | Centre for Health Analytics

Royal Children's Hospital and Murdoch Children's Research Institute

- Extract and analyse clinical data from the Parkville Epic Electronic Medical Record (EMR) system for clinical care, quality improvement, and research use cases across the RCH / MCRI campus.
- Design and optimise complex multi-table SQL queries against the Epic SQL warehouse to answer cohort, outcome, and operational questions for clinicians and researchers.
- Build and maintain Epic EMR Reports, Epic Dashboards, and Power BI views supporting clinical workflows, data capture validation, and audit / improvement loops.
- Partner with clinicians, researchers, and technical SMEs to map clinical workflows and document data-capture processes leveraging storytelling, ensuring appropriate use and interpretation of clinical data and insights.
- Deliver in-person and online training on EMR build solutions to clinical and technical audiences; present technical concepts in plain language to non-technical campus stakeholders.

Oct 2021 –
Nov 2024

Analytics Consultant | Quantum

Consumer (FMCG)

- Enhanced sales tools, systems, and processes for the FMCG Sales and Client Partnership teams, to help drive immediate and long-term sales growth.
- Contributed to internal sales operations tooling for Quantum's FMCG consulting practice, including sales pipeline tool guiding lead consultants and executives toward closing a multi-million dollar FY revenue gap.
- Updated costing tools and contract-win tracking; supported the migration to Kantata (resource and project management system), including configuration for contract tracking and staffing allocation.
- Wrote user stories for Kantata workflows; partnered with FMCG Sales and Client Partnership teams on requirements and process mapping.
- Adjacent work in Salesforce and HubSpot CRMs.

Health and Government

- Built and maintained 7+ Power BI dashboards consumed by department-wide executive and ministerial-office audiences at the Victorian Department of Health for ICU/ward/bed-capacity, workforce, and testing operations using software development life cycle and agile methodologies during the COVID-19 response.
- Automated mixed daily and near-real-time data pipelines for the same department in Azure Data Factory and DevOps with R and SQL transformations; pipelines absorbed feed schema changes mid-wave without disrupting executive briefings.
- Facilitated workshops and drove stakeholder engagement to map current state, gaps, and future state for a landmark precision oncology data strategy and governance initiative.
- Enhanced data visualisation tools used by Commonwealth Department of Health for Medicare non-compliance investigations.
- Led and mentored a team of 2-3 analysts, managing work-planning and insights development for an in-house education data asset.

Mar 2020 –
Oct 2021

Senior Data Analyst and Project Officer | Australian Institute of Health and Welfare

Screening Analysis and Monitoring Unit, Health Group

- Produced analytical insights and visualisations of population-level cancer-screening data (BreastScreen Australia, National Cervical Screening Program, National Bowel Cancer Screening Program) for the Commonwealth Department of Health using SAS, SQL, and Tableau.
- Defined and validated reportable cohorts under government governance; contributed to 2–3 formal government reports and resolved ad-hoc data requests and extraction from external stakeholders.
- Supported the data quality assurance and governance assessment for the National Cancer Screening Register.
- Prepared consultation papers and stakeholder briefings distilling published findings for Director / Branch-head sponsors at the Department.

Jan 2019 –
Mar 2020

Research Assistant | University of Melbourne

Cancer in Primary Care Research Group, Melbourne Medical School

- Developed educational materials for Victorian GPs on cancer prevention and management in collaboration with Cancer Council Victoria and the Department of Health.
- Created resources and academic detailing sessions to boost national bowel cancer screening participation in low uptake areas.
- Co-led data collection and participant follow-up for a randomised controlled trial on aspirin use for cardiovascular and cancer prevention.
- Advised on risk communication graphics for aspirin use and its impact on population health, and contributed as a junior faculty member, tutor, and peer reviewer in the academic community.

Aug 2018 –
Jan 2019

Research Support Officer | University of Melbourne

Integrated Mental Health Research Group, Melbourne Medical School

- Conducted participant follow-up, interviews, and data collection for two randomised controlled trials: the Link Me trial on stepped mental health care and the Target D trial on depression management tools, funded by the Australian Commonwealth Government and the NHMRC, respectively.

EDUCATION

Sep 2021 –
May 2026

Master of Science in Health Data Science

Centre for Big Data Research in Health, Faculty of Medicine, University of New South Wales

- The focus of this degree is the comprehension of complex health issues, through data wrangling and management, machine learning and data mining, data analytics, data modelling and communication including data visualisation
- Completed biostatistics, data management, context of health data, and statistical modelling, machine learning and population health subjects with 86 WAM (High Distinction)

Sep 2023

Applied Methods of Cost-Effectiveness Analysis Course

Health Economics Research Centre, Oxford Population Health, University of Oxford

- This classroom-based course focused on applied analytic methods for cost-effectiveness analysis to optimise resource allocation and maximise health gains in healthcare settings, including survival analysis, decision analysis and modelling, and bootstrapping.

Sep 2022

Certified Health Informatician Australasia (CHIA)

Australasian Institute of Digital Health

- CHIA is an industry certification for health informatics and digital health and is underpinned by six core competencies assessed within the Australian Health Informatics Competency Framework, including core health informatics principles, leadership and management, information technology, health sciences, social and behavioural science, and information science.

Mar 2015 –
Nov 2018

Bachelor of Biomedicine (Degree with Honours)

Faculty of Medicine, Dentistry and Health Sciences, University of Melbourne

- **Thesis:** Investigated communication methods for aspirin's risks and benefits in colorectal cancer prevention; graduated with First Class Honours.
- **Achievements:** Recruited 313 patients with a 95% recruitment rate; produced two peer-reviewed articles, a university news article with over 4500 views, and contributed to Cancer Council Victoria resources.
- **Honours:** Majored in Neuroscience with Second Class Honours; received Leaders in Communities Award, Dafydd Lewis Trust Scholarship, and Western Chances Scholarship.
- **International Experience:** Studied Foundations in Chinese Medicine and General Psychology at the Chinese University of Hong Kong (2017).
- **Roles:** Student Teaching Liaison for biomedicine subjects; involved in volunteering, university participation, and professional development activities.
